DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 15 June 2021 at 05:30 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Moderate levels of air pollution may develop in parts of east and southeast England due to the warm, sunny conditions. Otherwise, Low levels are expected to predomine in the UK.

Tomorrow: Remaining warm and largely sunny, contributing in the development of pockets of Moderate air pollution across parts of eastern England. Largely Low otherwise.

Outlook: Air quality levels will generally improve across the country from Thursday, due to the development of thundery outbreaks, although a few pockets of Moderate air pollution may persist in southeast England on Saturday.
